

## Barrel Clamp

Barrel Clamps - Called "Barrel Clamp", this hydraulic accessory is actually utilized on forklifts in order to clutch objects that you need to move using the lift truck. Typically, they are used to barrels, handle kegs, and paper rolls, with several barrel clamp designs having the ability to rotate the cargo. Like for instance, the rotate function allows the one operating the forklift to be able to slot in a vertically stored paper inside the horizontal intake of a printing press.
